

About

[AsCOLA - Assessing Courses of the Online Learning Agreement](#) is an Erasmus+ KA2 project aimed at developing a tool for students to evaluate courses taken on mobility, thereby influencing quality assessment processes of universities and ultimately impacting the quality of academic offer for mobility students. To achieve this ambitious goal, the project counts on the participation of 5 partners with extensive experience in the implementation of Erasmus+ projects: [Aristotle University of Thessaloniki](#) (AUTh) as the coordinator, [Eötvös Loránd University](#) (ELTE), the [Erasmus Student Network](#) (ESN), [Risbo B.V.](#) and the [European University Foundation](#) (EUF).

EWP Dashboard

The [EWP Dashboard](#) is available to all Higher Education Institutions in Europe and was designed specifically for institutions that are currently not using any digital solution to manage their Erasmus mobility management.

It is a free-to-use tool providing you with the basic functionality needed to manage the mobility processes of Erasmus+.

Online Learning Agreement (OLA)

The [Online Learning Agreement](#) is a digital solution built by universities and students, with the support of the European Commission, for one of the most important steps of any Erasmus exchange: correctly managing the Learning Agreement, which is a central document to ensure the recognition of ECTS earned abroad.

The Online Learning Agreement was originally developed in 2014 as an internal experiment at the EUF. Its early prototype was very well received by the universities in our network, which decided to share it with the whole HE community.

Over the years the OLA was perfected and thoroughly tested through three consecutive Erasmus+ KA2 Strategic Partnership funded by the Luxembourg National Agency, and today it is becoming the reference implementation for digital Learning Agreements in the context of the 2021-2027 Erasmus programme, as per the European Student Card Initiative.
